
Summer Special Courses 2017

暑期特別課程 2017

(17.07.2017-24.08.2017)

今年暑假，i-Learner 將開設多元化的夏季特別課程，孩子可以透過不同有趣的課程一邊練習語言技能，一邊發揮他們的活力和熱情呢！課程涵蓋不同範疇，從手工到莎士比亞包羅萬有，內容豐富有趣。向來備受歡迎的夏季課程特別專注於體驗式學習，讓孩子能夠在語言世界裏探索得更深，發掘更精彩的領域。

i-Learner teachers are going to offer these ten special courses this summer! Come and look for your own treasures!!

1. Magic Phonics

In 12 lessons, students will be introduced to the letter sounds, the concept of blending and segmenting. Students will apply their blending and segmenting skills to help with their reading aloud and spelling. Students will also learn about 37 common rhymes and how they help with their reading aloud and spelling. At the end of the course, students will be able to read aloud several poems and a story all by themselves.

2. Introduction to Spanish

Students will be introduced to greetings, numbers and colours and the basic grammar of Spanish in this intensive course. Students will also learn about Spanish culture and architecture. Students who already know some Spanish can enrol for senior classes which include reading and writing in Spanish.

3. Arts & Crafts

Students will work together with their teachers to create 12 crafts over this course. They will then learn about poems or stories related to the crafts and create their own description and interpretation of their crafts!

4. Storytelling and Poetry Reciting

Summer is the perfect time to enjoy storytelling and poetry. Students will study key storytelling skills like the effective use of their voice, body language as well as the skills to develop the plot in telling a story. They will also learn some key skills of poetry reciting so as to enjoy the beautiful rhythm of English poetry and to prepare for the coming Speech Festival.

5. Drawing & Writing

In this course, Ms. Xaviera is going to bring you on a magical journey of illustration and writing. At the end of the course, students will create their own book, with their own illustrations. Students do not need to learn how to draw before they join this class as we believe every child has an artist inside them!

6. Electronics, Programming and Robotics (EPR)

You must be curious about the robots that have been appearing on the i-Learner TV! Come and make one for yourself this summer with Mr. MacDonald. Students will create their own robots and understand the electronics and programming that go on behind the scenes. Come along to for a quick interview with Mr. MacDonald to see if this course is right for you.

7. Higher Order Thinking Skills

This course is conducted in Chinese. It guides students through the maze of thinking and helps students build up their logical and analytical thinking skills so they can understand different arguments. With careful coaching, students will come out more careful and critical thinkers.

8. Introduction to Latin

Latin is by no means a dead language here at i-Learner! Ms Lydia is going to provide a lively introduction to the language and the culture of Roman Britain. Led by Minimus the mouse, pupils learn basic grammar and vocabulary through stories featuring a real family. Latin is the stepping stone to all Romance languages so its study will open up students to a world of European languages while contextualising and strengthening the English grammar and critical thought they already have.

9. Understanding Shakespeare

People always complain that Shakespeare is too difficult, but that does not have to be true! This summer, our tutors from England would like to convince their students that Shakespeare's language is beautiful and the story plots are just as interesting as the movies in the cinema! Shakespeare wrote in order to entertain everyone who knows English and learning how to recite Shakespeare's plays helps students to understand aspects of the natural rhythm and intonation of English.

10. An introduction to Philosophy

Have you ever thought about who we are? What is knowledge? Have you thought about whether there is equality in this world and whether what we see is true? If you have, you might be interested in this introductory course to philosophy by Mr Justin who loves the subject and hopes to make you enjoy the subject too! By exploring philosophy, students will be able to think more deeply, speak more eloquently and write with a more logical and sophisticated style!

Courses	Kindergarten	Pre P1-P3	Pre P4-Pre P6	Pre S1-S3
Magic Phonics	(Pre K3-Pre P1) Tue & Thu 1020-1130/ Mon & Wed 0900-1010/ Tue & Thu 1020-1130	(Pre P2-Pre P3) Mon & Wed 0900-1010	Tue & Thu 1520-1630	Mon & Wed 1140-1250
