

Expeditions

Google's extensive VR and AR resources take you around the world and teach you about science, art, geography and more.

App: Expeditions (iOS/Android) - can be used with or without a VR Headset

<https://edu.google.com/products/vr-ar/expeditions/>

Google Arts and Culture Explore

Go inside artworks, walk through museums and more in this rich resource bank.

<https://artsandculture.google.com/explore>

Exploratorium

Thousands of short, engaging videos from across the curriculum, many of which have experiments or interesting extension activities to go with them. Plus a virtual gallery with lots of different exhibits to learn from.

<https://www.exploratorium.edu/explore>

Weird Cuts

Make AR art from a collage of images you take around your own home - create 3D art with nothing but a phone.

App: Weird Cuts (iOS/Android)

AirPano

Virtual trips to different tourist attractions in the world.

<http://airpano.com>

24/7 Live Panda webcam

Watch the 100+ pandas at the Chengdu Research Base, one of the biggest panda sanctuaries in China.

<https://www.youtube.com/watch?v=p6F14bsgig0>

24/7 San Diego Zoo webcams

Live camera to watch koalas, penguins, tigers and more. These animals live in the USA, so they're 16 hours behind us. Check them out at different times of their day and night.

<https://zoo.sandiegozoo.org/live-cams>

Smithsonian National Museum of Natural History

Walk through this huge museum and see their many famous exhibits (including dinosaurs!)

<https://naturalhistory.si.edu/visit/virtual-tour>

NASA 360 Tours

Take guided tours behind the scenes at NASA. The tours are all filmed in 3D, so you can see every corner of this amazing place!
